DETAILED ACTION

1. Claims 1-20 are pending. Pursuant to Applicant's Preliminary Amendment received October 20, 2003, the previous rejection is withdrawn.

Claim Rejections - 35 USC §101

2. Claims 17-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The basis of this rejection is set forth in a two-prong test of:

- (1) whether the invention is within the technological arts; and
- (2) whether the invention produces a useful, concrete, and tangible result.

For a claimed invention to be statutory, the claimed invention must be within the technological arts. Mere ideas in the abstract (i.e., abstract idea, law of nature, natural phenomena) that do not apply, involve, use, or advance the technological arts fail to promote the "progress of science and the useful arts" (i.e., the physical sciences as opposed to social sciences, for example) and therefore are found to be non-statutory subject matter. For a process claim, the recited process must somehow apply, involve, use, or advance the technological arts.

In the present case, claim 17 only recites an abstract idea. The recited computer program does not apply, involve, use, or advance the technological arts since all of the intended use capabilities can be performed in the mind of the user or by use of a pencil and paper.

Additionally, for a claimed invention to be statutory, the claimed invention must produce a useful, concrete, and tangible result. In the present case, the claimed invention computer program does not provide any of the above. It is suggested that Applicant consider directing these claims towards a computer readable medium encoded with a program to obviate this rejection.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 6, the phrase “system, comprising” is not clear. What is it that the word “comprising” references?

Claim 3, line 3, the phrase “system, comprising” is not clear. What is it that the word “comprising” references?

Claim 17, lines 3, 4, the phrase “user, comprising” is not clear. Is it the computer program, the computer readable medium or the user comprising the several modules that follow the word comprising?

Claim Rejections - 35 USC § 103

5. Claims 1-20, as understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Lewis, US Patent No. 6,513,019. Lewis discloses a plurality of real-time financial databases that transmit transaction/account information that may be simultaneously accessed, each database maintaining information about different accounts that may be in different formats, e.g. claim 1, and converted into a message format, e.g. cols. 8-9, lines 49-36. Lewis does not specifically disclose a first device to verify a user identification (ID) of an account holder using a computer readable medium comprising a computer program. To use a computer readable medium to verify a/multiple user ID of an account holder and dynamically cross-reference such for Lewis would have been obvious to one of ordinary skill in the art. Doing so would use well known security apparatus to safeguard access to Lewis' databases. The motivation for doing such would have been that using computer systems for security access to various accounts are well known and common knowledge in the financial market database instruments art, e.g. col. 16, lines 18-27.

6. Applicant's Information Disclosure Statement has been reviewed. Note attached PTO-1449.
